

**UNIVERSITY OF MUMBAI**

**Syllabus for the F.Y.B.Sc.**

**Program: B.Sc.**

**Course : AERONAUTICS**

**(Avionics Stream)**

(Credit Based Semester and Grading System with  
effect from the academic year 2011–2012)

## PREAMBLE

### NEED FOR LAUNCHING AERONAUTICS COURSE :

- a) To provide capable and trained persons to Aviation Industry.
- b) To fulfill the minimum academic qualification requirement so as to enable the graduates to compete for higher positions in the Aviation Industry.

The Aviation Industry is poised for substantial growth in India and this will go a long way for the country's overall development to be maintained at a high rate. The country has already witnessed the Open skies policy which led to significant increase in Air services which in turn required parallel growth in infra-structure. The need of the future, therefore will be felt in much greater requirement of skilled manpower in all streams connected with Aviation like management of increased number of airplanes and their maintenance. The movement of goods and people will have to be quick and this can only be achieved by an efficient, reliable and economic aviation industry. The industry therefore needs more and more aircraft and large workforce to keep them flying safely.

The Syllabus of B.Sc. (Aeronautics) degree is designed to enable the student to acquire the necessary qualification to enter into the Job market in any of the related fields of Aviation such as Traffic Control, Crew and Man power Scheduling, In-flight service department, Security, Civil Works department and Line and Major maintenance department of Engineering etc. The existing highly qualified work force of AMEs (Aircraft Maintenance Engineers) shouldering huge responsibility in the certification of an Aircraft carrying large number of passengers say 400 to 500 passenger capacity, are denied the higher positions in the Industry merely for not possessing Graduate degree in Aeronautics.

After obtaining B.Sc. degree in Aeronautics student may start his career as Trainee Technician with some stipend and then as Jr. Technician with salary of about Rs. 20,000 /- to Rs. 25,000/-. Further promotional avenues could be Sr. Technician, Charge hand, etc. depending on his achievements. The undergraduate study will significantly enhance the competency of the student to appear in the AME (Aircraft Maintenance Engineer) license examination conducted by DGCA (Director General of Civil Aviation).

After acquiring License qualification he can start his career as Aircraft Maintenance Engineer category and he may draw salary in the range of Rs. 55,000/- to 3,00,000/- per month depending upon his achievements and qualifications.

However, it is also possible that the graduates ( B.Sc Aeronautics) enter the field of Non-Technical streams in the Aviation Industry like Commercial Dept., In-flight service Dept., Ground Support Dept., Security Dept. etc. where the starting salary would be about Rs. 20,000/- rising to six figures.

It is, therefore, in fitness of things that such a degree course would help the student to make his career in Aviation.

Note : The eligibility to enroll in DGCA approved AME Course is 10 + 2 with 50% aggregate in Physics & Mathematics. However, the student joining the B.Sc. Aeronautics Course with lesser marks in 10 + 2 ( 45% or 40%) can also qualify for AME licence by fulfilling the experience requirement of DGCA.

**O.5960** Title : BACHELOR OF SCIENCE IN AERONAUTICS – (AVIONICS)

**O.5961** Eligibility: HSC (10 + 2 ) of MSBHSC or equivalent of any other Government state board with minimum 45% marks in aggregate ( 40% for reserve category) with English, Physics and Mathematics subjects

**OR**

Diploma (10 + 3) awarded by MSBTE or equivalent by any other Government body in following branches of engineering.

- i) Mechanical
- ii) Electronics
- iii) Electrical
- iv) Computer
- v) Information Technology
- vi) Automobile
- vii) Industrial Electronics
- viii) Radio Engineering and Telecommunication
- ix) Instrumentation

**R.8391** Duration:- The Course is for Three years - divided into Six Semesters but not more than Six years.

**R.8392** Intake Capacity:- B.Sc Aeronautics – Avionics - 60 students.

Internal assessment : Practical		
Best of Five	-	10 marks
Work Culture-		05 marks
Journal work -		05 marks
Total	-	20 marks

External Theory examination

60 Marks

- i) Duration – These examinations shall be of 2 Hours duration for each paper.
- ii) Theory Question Paper Pattern:-
  - There shall be four questions each of 15 marks. On each unit there will be one question and the fourth one will be based on entire syllabus.
  - All questions shall be compulsory with internal choice within the questions. (Each question will be of 20 to 23 marks with options.)
  - Question may be subdivided into sub-questions a, b, c... and the allocation of marks depend on the weightage of the topic.

**R.8396** Standard of passing : The Passing percentage for the Course is 40%. The candidate should score 40% in individual examination of the Course i.e. Theory & Practical ( as applicable ) examination.

Examination	Maximum Marks		Minimum Marks for passing		Total
	Written / Task	Internal Assessment	Written / Task	Internal Assessment	
Theory	60	40	24	16	40
Practical	30	20	12	08	20

Note: The Syllabus for the each Semester can be completed in at-least 20 weeks of Theory & Practical training. The hands-on training can be given only in the Aviation Organisation.

Theory / Practical : 20 weeks.

Unit tests : Every course in the Semester will have Two unit tests, each after Six weeks of training for the course. It will take Two weeks cumulative. One week for Final Semester Examination.

**SEMESTER I ( Avionics Stream)**

**(Electrical System, Instrument System & Radio Navigation)**

**Syllabus as per the Credit System**

**To be implemented from the Academic year 2011-2012**

**SEMESTER I**

Course Code	Contents	Credits
USARA101	<p><b>A) Civil Aviation Legislation</b></p> <p>a) Civil Aviation Requirements issued by Director General of Civil Aviation, Ministry of Civil Aviation, Central Govt. of India. Section II, Series A to J.</p> <p>b) Indian Aircraft Rules - 1937</p> <p><b>B) Human factor.</b></p> <p>a) Introduction to Human Factor.</p> <p>b) Human performance and limitations</p> <p>c) Social psychology</p> <p>d) Factors affecting performance</p> <p>e) Physical environment</p>	4
USARA102	<p><b>General Engineering to cover Physics &amp; Maths.</b></p> <p>A) Mass, Centre of Gravity, Work, Energy, Power, Pressure, stress, Torque, Elasticity of Material, Speed, Velocity, Newton's laws of motion, Principle of the Gyroscope. Friction, Viscosity, Fluid Resistance, Specific Gravity, Pressure &amp; Buoyancy in liquids, kinetic Theory of gases, Speed of sound.</p> <p>B) Heat &amp; Energy, Conversion, Thermodynamics, Charle's and Boyle's laws, Heat Transfer, Specific Heat, Absolute and relative humidity, Vapour locks, calorific values of fuels.</p> <p>C) Dynamics of fluid, Pascal's law &amp; its application in Hydraulic press, Hydraulic and Pneumatic system. Bernoulli's law, Venturi tube theory, Streamline, Laminar and turbulent flow</p>	4
USARA103	<p><b>Maintenance Practices &amp; Hardware</b></p> <p>General safety precautions in the workshop use of simple hand tools &amp; bench work, hammers, mallet, screw drivers, pliers, punch, wrench, special wrench, drills and reamers taps and dies use of cutting instruments Chisel hacksaw.</p>	2
USARA104	<p><b>Electrical &amp; Electronic Fundamentals.</b></p> <p>A) Electron Theory of Electricity, conductors, semi-conductors &amp; insulators. Static electricity. Electric circuits, laws of resistance, effect of temperature with simple calculations.</p> <p>B) Ohm's Law, EMF, arrangement of resistors in series &amp; parallel, Grouping of cells, Internal resistance of a cell, The wheat stone bridge, Kirchoff's Laws &amp; calculations, Faradys law &amp; Lenz's Laws, work energy &amp; power, Faradey's law of electromagnetic induction, eddy current, self &amp; mutual inductance, capacitance in series &amp; parallel combinations &amp; calculations.</p>	5

	<p><b>C)</b> Power source : storage batteries, theory &amp; principle of operations of Lead Acid batteries, construction, battery rating, testing of lead acid batteries, Nickel Cadmium Batteries, principle of operation, construction, charging, testing.</p> <p><b>D)</b> Electric Measuring Instruments : principle of operation of meter movements, Ammeter, voltmeter, shunt, multimeter, meggar, inductive pick up meters. Aircraft electrical wires &amp; wiring practices, characteristics of electrical wires. Bonding and bonding testers, Static dischargers Electrical control devices , switches, circuit breakers, Circuit protective devices, resistors and variable resistors, electro magnets, relays and solenoids etc. Basic Circuit, Analysis and Trouble Shooting.</p>	
<p><b>USARA105</b></p>	<p><b>Engineering Drawing</b> Use of Drawing Instruments, Lines &amp; lettering. Construction of parabola, ellipse, hyperbola. First and Third angle projections Technology, orthographic, Isometric oblique perspective.</p> <p><b>Communication Skills</b> Human rights constituents with special reference to Fundamental Rights in India. Importance and benefits of effective communication, concept of communication, Non-verbal communication. Seven C's of effective communication, Professional skill development, reading, writing: – letter writing, report writing, speaking &amp; listening: – discussion, debates.</p>	<p><b>5</b></p>

## SEMESTER II

Course Code	Contents	Credits
<b>USARA201</b>	<p><b>A) Civil Aviation Regulations</b></p> <p>a) Civil Aviation Requirements issued by Director General of Civil Aviation, Ministry of Civil Aviation, Central Govt. of India. Section II, Series K to X.</p> <p>b) Advisory Circulars, CAR - 66</p> <p><b>B) Human Factor</b></p> <p>a) Tasks</p> <p>b) Communication</p> <p>c) Human error</p> <p>d) Hazards in the workplace</p>	4
<b>USARA202</b>	<p><b>Aircraft Electricity &amp; Electronics Paper I</b></p> <p>a) Alternating Current elementary theory</p> <p>b) Poly phase Systems</p> <p>c) The transformers</p>	2
<b>USARA203</b>	<p><b>Digital Techniques &amp; Instruments – Paper I</b></p> <p>a) Fundamental laws of Transistors, Introduction to Logic Gates, Application of Logic Gates; Number System</p> <p>b) Requirement &amp; standard location, visibility &amp; grouping of instruments. Methods of display, range, scale &amp; markings. Flight instrument, power plant instrument, methods of mounting panels, illumination of instrument &amp; instrument panels. Instrument mechanism, temperature compensation of instrument mechanism, sealing of instruments.</p> <p>c) Atmospheric pressure &amp; its measurement, mercury barometer, kew barometer, aneroid barometer, U-tube barometer.</p> <p>d) Mechanical instruments: pressure instruments, Bowden tube principle, capsule, diaphragm, bellows. Pitot static system, altimeter, ASI, VSI, Machmeter.</p>	4
<b>USARA204</b>	<p><b>A) Workshop Technology</b></p> <p>Special purpose bolts, Self locking and non-self locking, Quick release fasteners, Cable fittings, Blind rivets, Pushpull linkages, Snap rings, Bolts and nuts of British manufacture.</p> <p><b>B) Corrosion &amp; NDT.</b></p> <p>Corrosion : Forms of corrosion, Factors affecting corrosion, Preventive maintenance, Corrosion prone areas, Removal of corrosion and treatment, Mechanical removal of rust, Chemical surface treatment, Removal from highly stressed parts, Sand blasting, Pickling, Light alloys Anodic Oxidation Process : Chromatising</p>	3

<p><b>USARA205</b></p>	<p><b>A) A/c Structure &amp; Systems Paper I:</b>  Requirements of airplane structure strength, major structural loads and stresses. Fuselage type, Truss monocoque, semi-monocoque &amp; Geodatic. Primary and Auxiliary control surfaces, Static and aerodynamic balance, Fail safe features, Structural failures, Symmetry check, Fuselage construction,</p> <p><b>B) Theory of Flight</b>  Thrust, Propulsion, thrust and Momentum, Variation of thrust &amp; Torque, Slipstream, Gyroscopic effect, Swing on takeoff. Level flight, Four forces, conditions of equilibrium, Tail plane, Loads on tail plane, Effect on down wash, Adjustable tail plane, Slab tail plane, Level flight at different air speeds, Relations between airspeed &amp; angle of attack, Effect of height and weight, Flying for maximum range and minimum drag range flying for endurance, Jet aircraft.</p> <p><b>C) Ice &amp; Rain Protection</b>  Description and components of a pneumatic de-icing system, installation, Functions of components, Maintenance checks, Thermal anti icing systems, Protection against overheat, Ducting, Windshield icing control system, water and toilet draining heaters, Rain Repellent system and Components, Windshield Wipers.</p> <p><b>D) Hydraulic System</b>  Pascal's Law fluids, Components of an aircraft's simple hydraulic system, Fluids lines &amp; fittings, Flexible hoses, Pressure range, material, Components &amp; their functions, Indicating systems, Hydraulic rigs, servicing, Leak checks, internal wear checks.</p> <p><b>E) Pneumatic System</b>  Pneumatic systems : High &amp; medium and low pressure systems components, Sources of pressure &amp; control</p>	<p>5</p>
<p><b>USARA206</b></p>	<p><b>Environmental Studies</b>  Environment composition, Man and Nature relation, Concept of Ecology and Ecosystem, Resources and wealth, exploitation of resources, optimum conservation of resources, Environmental degradation,  Disaster Management :- meaning, need, planning &amp; execution.</p>	<p>2</p>

## **INFRASTRUCTURE:**

- a) The basic Infrastructure required to start the Course in the Organization, at the start of the Course.

Infrastructure : As per University norms.

Basic Workshop : Having Lathe Machine, Drilling machines, Grinders, Surface table, bench vices etc.

Land area : Sufficient land for building a Hanger for parking the Institution owned aircrafts and Tarmac for giving run up and taxi check of those aircrafts.

The Cost of the above infrastructure and Basic Workshop is Rs. 25,00,000/- (approx. as on date) excluding the cost of land.

- b) After starting the Course, the Equipments required in the Organization at the start of Second semester

Laboratory / Workshop :

- i) Electrical Workshop
- ii) Instrument Workshop
- iii) Radio Navigation Workshop
- iv) Computer Workshop
- v) RT (Radio Telephony) - Communication

Note : All the shops to be well equipped to carry out practical of the students. The Cost of the above infrastructure is Rs. 80,55,000/- (approx. as on date)

- c) After starting the Course, the Infrastructure required in the Organization at the start of Third semester i.e. Second year will be as follows:-

- i) Hanger and Tarmac : For parking aircrafts, their run-up and taxiing for functional checks of the various systems.
- ii) Aircrafts : 1) Light aircraft (weight below 5700 kg) & Piston engine  
2) Heavy aircraft (weight above 5700 kg) & Jet engine
- iii) Workshops : 1) Engine Workshop  
2) Airframe Workshop

The Cost of the above is Rs. 2,93,00,000/- (approx. as on date)

Total cost for all three years a) + b) + c) = Rs. 3,98,55,000/-

### **Faculty Qualifications and requirements:**

Chief Instructor : a) One each, having BAMEL ( Basic Aircraft Maintenance Engineering Licence) and at least five years of Aviation Experience of which at least two years in the field of Instruction

OR

b) Engineering Graduate with at least two years of Practical experience in Aviation Industry of which at least one year in the field of Instruction.

**Instructors :**

Year	New Appointments	Total Appointments
1 <sup>st</sup> year	03	03
2nd year	03	06
3 <sup>rd</sup> year	03	09

Non Teaching

Office staff : 02 Jr. Clerk  
Peon : 03

## Scheme of Examination

### SEMESTER I ( Avionics Stream)

Course Code	Title of the Course	Theory		Practical		Total	Duration	
		Written	Internal	Task	Internal		Written	Task
USARA 101	Civil Aviation Legislation to cover CAR Series A to J and Human factor.	60	40	--	--	100	2 Hrs.	--
USARA 102	General Engineering to cover Physics & Maths.	60	40	30	20	150	2 Hrs.	2 Hrs.
USARA 103	Maintenance Practices & Hardware	60	40	--	--	100	2 Hrs.	
USARA 104	Electrical & Electronic Fundamentals.	60	40	30	20	150	2 Hrs.	2 Hrs.
USARA 105	Engineering Drawing	--	--	60	40	100	--	2 Hrs.
	Communication Skill	60	40	--	--	100	2 Hrs.	--
Total						700		

### SEMESTER II (Avionics Stream)

Course Code	Title of the Course	Theory		Practical		Total	Duration	
		Written	Internal	Task	Internal		Written	Task
USARA 201	Civil Aviation Regulations Series K-X, Advisory Circulars, CAR - 145	60	40	--	--	100	2 Hrs.	--
USARA 202	Aircraft Electricity & Electronics Paper I	60	40	--	--	100	2 Hrs.	--
USARA 203	Digital Techniques & Instruments–Paper I	60	40	30	20	150	2 Hrs.	2 Hrs.
USARA 204	Workshop Technology, Corrosion, NDT.	60	40	--	--	100	2 Hrs.	--
USARA 205	A/c Structure & Systems Paper I: Theory of Flight, Ice & Rain, Hydraulics, Pneumatics.	60	40	30	20	150	2 Hrs.	2 Hrs.
USARA 206	Environmental Studies	60	40	--	--	100	2 Hrs.	--
Total						700
