

**Workshop on  for
Computer Science/ I.T. / Computer Applications Faculty
January 23 – 24, 2014
Organised by
Institute of Distance and Open Learning, University of Mumbai**

About Moodle

Moodle is a Course Management System (CMS), also known as a Learning Management System (LMS) or a Virtual Learning Environment (VLE). It is a free web application that educators can use to create effective content management site. It has become very popular among educators around the world as a tool for creating online dynamic web sites for their students.

Many institutions use it as their platform to conduct fully online courses, while some use it simply to augment face-to-face courses (known as blended learning). Many educators prefer to use Moodle as a way to deliver educational content to students and assess their learning using assignments or quizzes.

About Workshop

This workshop aims to train faculty in the free Learning Management System MOODLE. This workshop will help faculties to enable to create an interactive environment and integrate technology into their daily teaching schedule.
