

AC 6/6/2012
Item No. 4.68

UNIVERSITY OF MUMBAI

Revised Syllabus for the
M.E. (Instrumentation and Control Engineering)

(As per Credit Based Semester and Grading System with
effect from the academic year 2012–2013)

University of Mumbai
Program Structure for
M.E. Instrumentation and Control
(With Effect from 2012-2013)

Semester I

| Subject Code | Subject Name | Teaching Scheme (Contact Hours) | | | Credits Assigned | | | | |
|--------------|--|------------------------------------|-----------|-----------|------------------|-------------------------|-----------|--------------|-------|
| | | Theory | Pract. | Tut. | Theory | Pract. | Tut. | Total | |
| ISC101 | Applied Linear algebra | 04 | -- | -- | 04 | -- | -- | 04 | |
| ISC102 | Advanced sensors and signal processing systems | 04 | -- | -- | 04 | -- | -- | 04 | |
| ISC103 | Adaptive control theory | 04 | -- | -- | 04 | -- | -- | 04 | |
| ISE101x | Elective I | 04 | -- | -- | 04 | -- | -- | 04 | |
| ISE102x | Elective II | 04 | -- | -- | 04 | -- | -- | 04 | |
| ISL101 | Lab Practice-I | -- | 02 | -- | -- | 01 | -- | 01 | |
| ISL102 | Lab Practice-II | -- | 02 | -- | -- | 01 | -- | 01 | |
| Total | | 20 | 04 | -- | 20 | 02 | -- | 22 | |
| Subject Code | Subject Name | Examination Scheme | | | | | | | |
| | | Theory | | | | | Term Work | Pract. /oral | Total |
| | | Internal Assessment | | | End Sem. Exam. | Exam. Duration (in Hrs) | | | |
| | | Test1 | Test 2 | Avg. | | | | | |
| ISC101 | Applied Linear algebra | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISC102 | Advanced sensors and signal processing systems | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |

| | | | | | | | | | |
|--------------|-------------------------|------------|------------|------------|------------|-----------|-----------|-----------|------------|
| ISC103 | Adaptive control theory | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISE101X | Elective I | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISE102X | Elective II | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISL101 | Lab Practice-I | -- | -- | -- | -- | -- | 25 | 25 | 50 |
| ISL102 | Lab Practice-II | -- | -- | -- | -- | -- | 25 | 25 | 50 |
| Total | | 100 | 100 | 100 | 400 | -- | 50 | 50 | 600 |

Semester II

| Subject Code | Subject Name | Teaching Scheme (Contact Hours) | | | Credits Assigned | | | |
|--------------|--|------------------------------------|-----------|-----------|------------------|-----------|-----------|-----------|
| | | Theory | Pract. | Tut. | Theory | Pract. | Tut. | Total |
| ISC201 | Stochastic Processes | 04 | -- | -- | 04 | -- | -- | 04 |
| ISC202 | Advanced process Instrumentation and control | 04 | -- | -- | 04 | -- | -- | 04 |
| ISC203 | Introduction to Non-linear control theory | 04 | -- | -- | 04 | -- | -- | 04 |
| ISE203X | Elective III | 04 | -- | -- | 04 | -- | -- | 04 |
| ISE204X | Elective IV | 04 | -- | -- | 04 | -- | -- | 04 |
| ISL201 | Lab Practice-III | -- | 02 | -- | -- | 01 | -- | 01 |
| ISL202 | Lab Practice-IV | -- | 02 | -- | -- | 01 | -- | 01 |
| Total | | 20 | 04 | -- | 20 | 02 | -- | 22 |

| Subject Code | Subject Name | Examination Scheme | | | | | | | |
|--------------|--------------|---------------------|--------|------|----------------|-------------------------|-----------|--------------|-------|
| | | Theory | | | | | Term Work | Pract. /oral | Total |
| | | Internal Assessment | | | End Sem. Exam. | Exam. Duration (in Hrs) | | | |
| | | Test1 | Test 2 | Avg. | | | | | |

| | | | | | | | | | |
|--------------|--|------------|------------|------------|------------|-----------|-----------|-----------|------------|
| ISC201 | Stochastic Processes | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISC202 | Advanced process Instrumentation and control | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISC203 | Introduction to Non-linear control system | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISE203X | Elective III | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISE204X | Elective IV | 20 | 20 | 20 | 80 | 03 | -- | -- | 100 |
| ISL201 | Lab Practice-III | -- | -- | -- | -- | -- | 25 | 25 | 50 |
| ISL202 | Lab Practice-IV | -- | -- | -- | -- | -- | 25 | 25 | 50 |
| Total | | 100 | 100 | 100 | 400 | -- | 50 | 50 | 600 |

Semester III

| Subject Code | Subject Name | Teaching Scheme (Contact Hours) | | | Credits Assigned | | | |
|--------------|----------------|------------------------------------|-----------|-----------|------------------|------------|---------------|------------|
| | | Theory | Pract. | Tut. | Theory | Pract. | Tut. | Total |
| ISS301 | Seminar | -- | 06 | -- | -- | 03 | -- | 03 |
| ISD301 | Dissertation I | -- | 24 | -- | -- | 12 | -- | 12 |
| Total | | -- | 30 | -- | -- | 15 | -- | 15 |
| Subject Code | Subject Name | Examination Scheme | | | | | | |
| | | Theory | | | | Term Work | Pract. / Oral | Total |
| | | Internal Assessment | | | End Sem. | | | |
| | | Test1 | Test 2 | Avg. | Exam. | | | |
| ISS301 | Seminar | -- | -- | -- | -- | 50 | 50 | 100 |
| ISD301 | Dissertation I | -- | -- | -- | -- | 100 | -- | 100 |
| Total | | -- | -- | -- | -- | 150 | 50 | 200 |

Semester IV

| Subject Code | Subject Name | Teaching Scheme (Contact Hours) | | | Credits Assigned | | | |
|--------------|-----------------|------------------------------------|--------|------|------------------|------------|---------------|------------|
| | | Theory | Pract. | Tut. | Theory | Pract. | Tut. | Total |
| ISD401 | Dissertation II | -- | 30 | -- | -- | 15 | -- | 15 |
| Total | | -- | 30 | -- | -- | 15 | -- | 15 |
| Subject Code | Subject Name | Examination Scheme | | | | | | |
| | | Theory | | | | Term Work | Pract. / Oral | Total |
| | | Internal Assessment | | | End Sem. | | | |
| | | Test1 | Test 2 | Avg. | Exam. | | | |
| ISD401 | Dissertation II | -- | -- | -- | -- | 100 | 100 | 200 |
| Total | | -- | -- | -- | -- | 100 | 100 | 200 |

Note:

- In case of Seminar, 01 Hour / week / student should be considered for the calculation of load of a teacher
- In case of Dissertation I, 02 Hour / week / student should be considered for the calculation of load of a teacher
- In case of Dissertation II, 02 Hour / week / student should be considered for the calculation of load of a teacher
- **End Semester Examination:** In all six questions to be set, each of 20 marks, out of these any four questions to be attempted by students. Each question will comprise of mixed questions from different units of the subjects.

| Subject Code | Elective I | Subject Code | Elective II |
|--------------|-------------------------------------|--------------|---|
| ISE1011 | Bio- instrumentation and imaging | ISE1021 | Instrumentation for non-conventional energy sources |
| ISE1012 | Advanced analytical instrumentation | ISE1022 | Advanced micro/nano systems |

| | | | |
|---------|----------------------------|---------|---|
| ISE1013 | Automotive Instrumentation | ISE1023 | Advanced Electronic Circuits For Instrumentation And Control Applications |
| ISE1014 | Robotics | ISE1024 | Process Identification |

| Subject Code | Elective III | Subject Code | Elective IV |
|---------------------|--|---------------------|--|
| ISE2031 | Advanced digital signal processing | ISE2041 | Advanced embedded system for Instrumentation |
| ISE2032 | Advanced Nuclear Instrumentation | ISE2042 | Principles of tomographic Imaging |
| ISE2033 | Reliability Engineering | ISE2043 | Fuzzy Logic, Neural network and control |
| ISE2034 | Fiber Optics and laser Instrumentation | ISE2044 | Intelligent And Autonomous Control |

| Subject Code | Subject Name | Credits |
|---------------|-------------------------------|-----------|
| ISC101 | Applied Linear Algebra | 04 |

| Module | Detailed content | Hours |
|----------|---|-------|
| 1 | Euclidean Vector Spaces :Euclidean n-Space, Linear Transformation from R^n to R^m ,Properties of Linear Transformations from R^n to R^m , Linear Transformations and Polynomials | 10 |
| 2 | General Vector Spaces : Real Vector Spaces, Subspaces, Linear Independence, Basis and Dimension, Row Space, Column Space & Nullspace, Rank and Nullity. | 10 |
| 3 | Inner Product Spaces :Inner Products, Angle and Orthogonality in Inner Product Spaces, Orthonormal Bases; Gram-Schmidt Prodcess; Q R-Decomposition, Best Approximation; Least Squares, Change of Basis, Orthogonal Matrices. | 10 |
| 4 | Eigenvalues, Eigenvectors :Eigenvalues and Eigenvectors, Diagonalization, Orthogonal Diagonalization | 10 |
| 5 | Linear Transformation :General Linear Transformation, Kernel and Range, Inverse Linear Transformations, Matrices of General Linear Transformations, Similarity, Isomorphism | 08 |

| | | |
|---------------|--|-----------|
| Subject Code | Subject Name | Credits |
| ISC102 | Advanced Sensor And Signal Processing Systems | 04 |

| Module | Detailed content | Hours |
|--------|---|-------|
| 1 | Classification of instruments transducers: Input and output characteristics of various transducers, variable resistance transducer and its equivalent circuit, potentiometers, their construction and performance, variable inductance and variable capacitance transducers, their construction and performance, Piezoelectric transducer. | 10 |
| 2 | Design techniques for sensor signal conditioning: Sensor and signal conditioning for strain, force, pressure, flow and temperature measurement, Bridge configurations, Amplifying and linearising bridge outputs, Driving bridge circuits. Ratiometric techniques. | 10 |
| 3 | High impedance sensors: Photodiodes and high impedance charge output sensors, Signal conditioning of high impedance sensors | 06 |
| 4 | Positioning, motion and temperature sensors : LVDT, Hall effect magnetic sensors, optical encoders Accelerometer, RTDs, thermistors, thermocouples, semiconductors temperature sensors and their signal conditioning | 08 |
| 5 | Micro-sensors and smart sensors: Construction , characteristics, and applications. | 06 |
| 6 | Hardware design techniques : Grounding in mixed signal systems, Power supply noise reduction and filtering, Shielding and isolation technique, Over-voltage and Electrostatic discharge (ESD) protection techniques. | 08 |

| Subject Code | Subject Name | Credits |
|---------------|--------------------------------|-----------|
| ISC103 | Adaptive control theory | 04 |

| Module | Detailed content | Hours |
|----------|--|-------|
| 1 | Introduction : Adaptive control-definitions-essential aspects-classification; Different approaches to Adaptive Control; Feedforward Adaptive Controllers; Feedback Adaptive Controllers | 04 |
| 2 | Adaptive Control Based on Discrete-Time Process Identification : Online Identification of Dynamic Processes and Stochastic Signals ; Process and Signal Models; Nonparametric Identification Methods; Parametric Identification Methods; Recursive Parameter Estimation Methods; Parameter Estimation of Time-varying Processes; Online Identification in Closed Loop; Determination of Model Order and Deadtime; Comparison of Different Parameter Estimation Methods. | 10 |
| 3 | Controller Design : The General Linear Controller; The PID Controller; The Cancellation Controller; The Deadbeat Controller; The Predictor Controller; The Minimum Variance Controller; The Generalized Predictive Controller; The State Controller and Observer; Suitable Control Algorithms for Adaptive Control. | 10 |

| | | |
|----------|--|----|
| | | |
| 4 | Parameter Adaptive Control : Basic Approaches of Parameter Adaptive Control; Suitable Combinations of Parameter Estimators and Controllers; Stochastic Parameter Adaptive Controllers; Deterministic Parameter Adaptive Controllers; Comparison of some Parameter Adaptive Controllers; Parameter Adaptive Feedforward Control. | 14 |
| 5 | Adaptive Control Based on the Model Reference Technique : Model Reference Control with Local Parameter Optimization (Gradient Methods) ; Continuous-time MRAS; Examples with a Simulated Process | 10 |

| Subject Code | Subject Name | Credits |
|----------------|--|-----------|
| ISE1011 | Bio-Instrumentation and Imaging | 04 |

| Module | Detailed content | Hours |
|--------|---|-------|
| 1 | Transducers and Instrumentation for Bio-potential recording: Sensors , Bio-potential Amplifiers (Chopper amplifier, Isolation amplifiers, Advanced Inst. Amplifiers), Multichannel Data acquisition system, Signal conditioning circuit design for ECG, EEG, and EMG etc., Noise and Interference, Grounding techniques, Optimization of Performance characteristics. | 12 |
| 2 | Cardiac and Neuro-assist devices: Cardiac Pacemaker, types, constructional details and design, Defibrillator and design, Stimulation electronics - Nerve and Muscle stimulators, Patient monitoring system | 12 |
| 3 | Implantable electronic devices and recent advancements: Wireless power and data transmission, receiver and transmitter specifications, Telemedicine, Implants – cochlear and retinal, Brain stimulators. | 12 |
| 4 | Medical Imaging Systems X-ray and CAT - tube design, image intensifier design, methods of image reconstruction , 3-D imaging. MRI - Pulse sequencing and MR image acquisition and reconstruction techniques Nuclear and Functional imaging - Radiation detectors, scanners, Gamma camera, PET, SPECT, fMRI Medical image processing - image reconstruction techniques like sampling, compression, segmentation and restoration . | 12 |

| Subject Code | Subject Name | Credits |
|----------------|-----------------------------------|-----------|
| ISE1013 | Automotive Instrumentation | 04 |

| Module | Detailed content | Hours |
|--------|---|-------|
| 1 | Thermodynamic engine cycles, ideal combustion engines, comparison of different engine concepts, potential of different fuels and propulsion systems. | 08 |
| 2 | Basic engine operation, fuel control, ignition control, lambda control, idle-speed control, knock control, combustion torque estimation. | 10 |
| 3 | Basic driveline equations, modeling of neutral gear, State-space formulation, Driveline speed control, Driveline control for gear shifting. | 08 |
| 4 | Vehicle modeling, wheel model, tyre characteristics, complete vehicle model, validation of the model, velocity estimation. | 12 |
| 5 | Vehicle control system, Antilock Braking Systems (ABS), control cycles of ABS, road model, PID driver model, hybrid driver model, model of human information acquisition, complete driver model | 10 |

|----------------|--|-----------|
| Subject Code | Subject Name | Credits |
| ISE1021 | Instrumentation for non-conventional energy sources | 04 |

| Module | Detailed content | Hours |
|--------|---|-------|
| 1 | <p>Energy resources and their utilization:</p> <p>Indian and global energy sources, Energy exploited, Energy planning, Energy parameters (energy intensity, energy-GDP elasticity), Introduction to various sources of energy, Solar thermal, Photovoltaic, wind energy, Biomass, Ocean thermal, Tidal and wave energy, Geothermal energy, Hydrogen energy systems, Fuel cells, Decentralized and dispersed generation.</p> | 02 |
| 2 | <p>Solar photovoltaic system:</p> <p>Photovoltaic effect, Efficiency of solar cells, Semiconductor materials for solar cells, Solar photovoltaic system and its instrumentation, Standards of solar photovoltaic system, Applications of PV system, PV hybrid system.</p> | 06 |
| 3 | <p>Biogas:</p> <p>Photosynthesis, Bio gas production Aerobic and anaerobic bio-conversion process, Raw materials, Properties of bio gas, Producer gas, Transportation of bio gas, bio gas plant technology & status, Community biogas plants, Problems involved in bio gas production, Bio gas process instrumentation and applications, Biomass conversion techniques, Biomass gasification, Energy recovery from urban waste, Power generation from liquid waste, Biomass cogeneration, Energy plantation.</p> | 08 |
| 4 | <p>Wind energy:</p> <p>Properties of wind, Availability of wind energy in India, wind velocity, Wind machine fundamentals, Types of wind machines and their characteristics, Horizontal and Vertical axis wind mills, Elementary design principles, Coefficient of performance of a wind mill rotor, Aerodynamic considerations in wind mill design, Selection of a wind mill, Wind energy farms, Recent development.</p> | 06 |
| 5 | <p>Nuclear Power:</p> <p>Design and instrumentation for nuclear reactors-pressurised water, boiling power, gas cooled, fusion and heavy water reactors.</p> | 06 |

| | | |
|----|---|----|
| 6 | Tidal power: Tides and waves as sources of energy, Fundamentals of tidal power, Use of tidal energy, Limitations of tidal energy conversion systems. | 04 |
| 7 | Hydrogen Energy: Properties of hydrogen in respect of it's use as source of renewable energy, Sources of hydrogen, Production of hydrogen, Storage and transportation, Problems with hydrogen as fuel, Development of hydrogen cartridge. | 06 |
| 8 | Geothermal energy: Structure of earth's interior, geothermal sites, earthquakes & volcanoes, Geothermal resources, Principal of working, Types of geothermal station with schematic representation, Problems associated with geothermal conversion. | 04 |
| 9 | Ocean energy: Principle of ocean thermal energy conversion, Wave energy conversion machines, Power plants based on ocean energy, Problems associated with ocean thermal energy conversion systems, Thermoelectric OTEC, Developments of OTEC. | 04 |
| 10 | Energy storage: Compressed air energy, flywheel energy, electrochemical energy, magnetic energy, thermal, chemical and hydrogen energy. | 02 |

Guidelines for Seminar

- Seminar should be based on thrust areas in Electrical Engineering
- Students should undergo literature survey and identify the topic of seminar and finalize in consultation with Guide/Supervisor. Students should use multiple literatures and understand the topic and compile the report in standard format and present in front of Panel of Examiners appointed by the Head of the Department/Institute of respective Program.
- Seminar assessment should be based on following points
 - Quality of Literature survey and Novelty in the topic
 - Relevance to the specialization
 - Understanding of the topic
 - Quality of Written and Oral Presentation

IMPORTANT NOTE:

1. Assessment of Seminar will be carried out by a pair of Internal and External examiner. The external examiner should be selected from approved panel of examiners for Seminar by University of Mumbai, OR faculty from Premier Educational Institutions /Research Organizations such as IIT, NIT, BARC, TIFR, DRDO, etc. OR a person having minimum Post-Graduate qualification with at least five years' experience in Industries.
